

Lab 5 – Tables and Forms

Create the following Web page:

Images are available on MyCanvas in Modules → Labs → Lab 5.

You'll create the **seminars.html** and **reviews.html** Web pages for a company that sells Cycling Tours. Use `` and `<div>` and classes where appropriate. Do NOT use inline styles or deprecated HTML elements. Use the following techniques:

- The `<title>` element should contain *Outdoor Adventure Seminars* or *Outdoor Adventure Reviews*.
- CSS styles should be as follows:
 - External stylesheet called `adventuretypes.css`
 - contains the CSS required for elements that would be common to the `seminars.html` and `reviews.html` web pages, except for the nav.
 - External stylesheet called `mobile.css`
 - Contains the CSS for a responsive nav as follows:
 - Width up to 599 px should show the nav as vertical.

- Width between 600 px and 899 px should display the nav as centered

- Width of 900 px or more should display the nav as spreading with space between each tab (use the space-between justification).

Outdoor Adventure Seminars 2022/2023							
Legend:							
Beginner Cycling Long Distance Cycling Hiking Camping							
Schedule is subject to change							
Day	7 am - 9 am	9 am - 11 am	11 am - 12 pm	12 pm - 2 pm	2 pm - 4 pm	6 pm - 8 pm	8 pm - 10 pm
Monday	Beginner Cycling	Hiking	Camping				
Tuesday	Reserved for groups						
Wednesday	Long Distance		Beginner	Camping in	Long Distance		
Thursday	Cycling Part 1	Camping	Cycling	Asia	Cycling Part 2	Hiking	
Friday		Beginner Cycling					
Saturday	Camping in	Hiking			Beginner Cycling	Long Distance	
Sunday	Europe					Cycling Part 1 and 2	
Holidays		Long Distance Cycling	No Seminars				

- Embedded styles
 - Styles that are specific to the individual page should be embedded (placed in the style element in the individual Web page). For the seminars.html Web page, embed the styles for the table and for the reviews.html Web page, embed the styles for the form.
- The colours used in the Web page are listed in the marked-up images.
- The reviews.html Web page should have the following form functionality:
 - The form should submit to **<https://csunix.mohawkcollege.ca/tooltime/showit.pl>** using the post method.
 - The default trip should be B.C. Coast.
 - The value passed to the server for the duration of the trip should be 5d, 7d, 10d, 14d.
 - The value for the ratings (wheels images) radio controls passed to the server should be numeric (1, 2, 3, 4) and the 4 wheel rating radio control should be selected.
 - The comment box should be able to contain 7 rows, and 65 characters per row.
 - Trips per time of year should allow the user to select more than one item, and should display all 4 items.
 - The first name and last name text boxes should restrict users to entering a maximum of 20 characters.
 - The Phone Number textbox should be able to contain 12 characters and restrict users to entering no more than 12 characters. It should also contain placeholder text 123-456-7890.
 - The email textbox should be able to contain 40 characters and restrict users to entering no more than 40 characters. It should also contain placeholder text name@example.com.
 - The checkbox for Mountains should be checked by default.
 - The **Send Information** button should submit the form data.
 - The **Cancel** button should reset the form data to the default values.
 - Include a hidden form element called **formname** with a value of **Your Name Trip Review**.

- Include an image showing the submitted form elements for grading purposes, as described further in this document.
- Create the links in the nav so that Reviews points to reviews.html and Seminars points to seminars.html.

****HINT: Seminars - There are 2 tables. The legend is a one-row table with a caption. ****

****HINT: The form controls may not align properly in IE. Have a look at the inline-block property.**

Submitting the Lab

Create a .zip file called YourNameLab5.zip that contains ALL files required for the lab, including subfolders with files. Upload the zip file to the Lab 5 Assignment on myCanvas.

Although helping each other to troubleshoot code is encouraged, it is expected that you actually do your own work. If you do, you will learn the material and feel better for it. Since all work submitted to your professor is assumed to be your own original work, you must include the following “Statement of Authorship” in EVERY file you submit for grading:

All labs must contain the authorship in the HTML source code.

```
<!-- Author: John Doe, 000123456 -->
```

Replace John Doe with your name and the number 000123456 with your student ID

Place this text as a comment at the top of the code for each submitted web page

Failure to include this statement means your work may receive a deduction of a maximum of 10% of the Lab grade.

All labs must be created this semester. A lab from a previous semester that is submitted for this semester will be graded as 0.
